**PRESS RELEASE 2006 - 03**

**June 22, 2006**

## **Spruce Ridge Begins Airborne Geophysics on Turner's Ridge Property**

**NORFOLK COUNTY, Ontario:** John A. Ryan, president of Spruce Ridge Resources Ltd., (TSXV:SHL) is pleased to announce the beginning of an airborne geophysical program on the Turner's Ridge property located in western Newfoundland. The geophysical program will consist of a 460-km high-resolution radiometric, magnetic and electromagnetic airborne survey.

After interpretation of the survey results, ground follow-up work, including detailed prospecting, will be carried out.

The Turner's Ridge property lies to the north of and on strike with the Rocky Brook uranium project of JNR Resources Ltd. and Altius Minerals Corp.

Noranda Exploration Co., Ltd. conducted field work on the property in June 1977 which included stream sediment sampling. The samples were analyzed for copper, lead, zinc and uranium. Several uranium anomalies were located with values up to 20 ppm U. The Noranda campaign, which included the discovery of the Turner's Ridge group of lead-zinc zones, is the only substantial exploration program carried out on the property to date.
