**PRESS RELEASE 2008 - 9**

**December 10, 2008**

## **RX Exploration Continues To Hit High Grade Gold and Silver**

**FOR IMMEDIATE RELEASE:** Norfolk County, Ontario, Canada, December 10, 2008 - John A. Ryan, President of Spruce Ridge Resources (**TSX-V:SHL**) is pleased to report that RX Exploration continues to hit high grade gold and silver at the Drumlummon mine in Montana. The complete news release is reproduced below. Spruce Ridge owns approximately 16.5% of the issued and outstanding shares of RX Exploration.

On November 25, 2008 RX Exploration Inc. ("the Company") announced an initial NI 43-101 compliant inferred resource of 155,518 tons containing 70,703 oz. of gold and 1,915,560 oz. of silver from its ongoing underground diamond drill program at the Drumlummon Mine at Marysville, Montana. The calculations were made from a limited select unmined area of the mine. Timothy J. Beesley, P.Eng., the Company's qualified person under NI 43-101 who prepared the calculations stated that "the discovery of the 400E veins in virgin rock 400 feet into the hanging wall, in areas of the mine never before tested, is extremely significant."

In addition to the high grade results already reported, the Company is pleased to report new assay results from three more holes drilled from Diamond Drill Station # 7 established on the 400 foot level of the mine. True widths of the intersections have not yet been determined. Additional assays from all holes are pending.

Drill Hole	From (ft)	To (ft)	Length (ft)	Gold (oz/t)	Silver (oz/t)
DDH 08 #62	356	374	18	0.374	1.1
	(including a 10 ft section grading 0.625 oz/ton gold and 1.23oz/ton silver)				
DDH 08 #65	288	296	8	0.441	1.1
DDH 08 #66	304	322	18	0.169	5.7
	(including a 6 ft section grading 0.396 oz/ton gold and 9.9 oz/ton silver)				

These results continue to demonstrate that the potential for developing very significant tonnage of high grade gold and silver over large widths in this "bonanza"- type epithermal deposit is considerable.

L. Joseph Bardswich, P.Eng. (Mining) (Ontario), the qualified person responsible for providing the drill results contained in this press release, emphasized that there is "abundant gold and silver in this system".

The Company's common shares are listed on the Canadian National Stock Exchange (CNSX) (**Symbol: RXE**). There are currently 45,536,508 common shares issued and outstanding.
